

# **What have we learnt from enabling regulation?**

**Dr Richard A Savage, ONR Chief Nuclear Inspector**

# Enabling Regulation – What is it?

A constructive approach with dutyholders and other relevant stakeholders to enable delivery against clear and prioritised safety & security outcomes

# Enabling Regulation – What have we learnt?

## The message is subtle

dutyholder obligation to demonstrate & deliver safety & security is unchanged

independence in regulatory decision making is retained and absolute

need for joined-up message

## Positive behaviours are key

constructive, committed, open, trusted engagement

## One size does not fit all

consistent application of regulatory principles - e.g. proportionate and targeted

## Need for clarity

principles, behaviours & examples of enabling

consolidated risk policy

## Industry has a vital part to play

robust internal dutyholder regulation

quality safety & security submissions

industry peer working

more effective feedback - and our listening

## Round table discussion

### Question 1

What challenges are there for industry in an enabling approach?

**Tables: 3, 5, 7, 9, 11**

### Question 2

Are there any areas where enabling is not appropriate?

**Tables: 2, 4, 6, 8, 10**
