VENUE: ONR, Redgrave Court, Merton Road, Bootle, UK

OBJECTIVES

- Review progress across the various project work undertaken by the panel
- TAG13 and Expert Panel papers – progress and next steps

ATTENDEES:

ONR
Durham University
Edinburgh University
Exeter University
Liverpool University
EA
Met Office
Technical Secretary

Day 2 – 2 November 2016

7. Introduction

welcomed to the group and invited everyone to introduce themselves. He added that it was a busy agenda and that the main focus would be on the TAG13 Coastal Flooding and Met Hazards annexes together with their supporting Expert Panel papers, which had been circulated prior to the meeting.

9/10. Hinkley Point C, Wylfa B, Sizewell, Moorside – Summary of Progress

summarised progress on each of the projects in relation to Climate Change issues. reported that Horizon had completed a report on Met Hazards a few years ago and that it was not clear in the current situation, whether ONR should review it. reported that had not had any contact with SZC since December 2015 and that this engagement will start soon.

ⁱ The minutes of the expert panel meetings should not be used out of context, the consolidated technical advice from the expert panels can be found in the expert panel papers which support the [Technical Assessment Guide on External Hazards](#)
