

ONR ASSESSMENT NOTE

Selection of Standards and Criteria for Assessment

Technical Area / Topic:	Fault Analysis	
Date Withdrawn:	April 2013	
Reason:	TAG is redundant and should be withdrawn	
Approved by:	D Senior	Director Regulatory Standards
Record Reference:	Trim Folder 1.1.3.563.. (2013/154510)	

1. Following a fit for purpose review, T/AST/044 Issue 001 “Fault Analysis” has been withdrawn. Its technical content, while being intrinsically sound, is adequately covered in the Safety Assessment Principles (SAPs) and other Technical Assessment Guides (TAGs).

2. The standards and criteria that need to be specified in assessment reports may be selected from the following:

- HSE SAPs 2006 Edition, Revision 1: SAPs – FA.1 – FA.24
- ONR TAGs: T/AST/034 and T/AST/042
- IAEA standard and guides: IAEA Safety Standards – Safety Assessment for Facilities and Activities, GSR Part 4
- WENRA Reactor Safety Reference Levels: Issues E and F
- Any other guidance deemed appropriate by NTL/Professional lead
