

Office for Nuclear Regulation (ONR) Quarterly Site Report for Low Level Waste Repository Limited

Report for period 1 April – 30 June 2017

Foreword

This report is issued as part of ONR's commitment to make information about inspection and regulatory activities relating to the above site available to the public. Reports are distributed quarterly to members of the West Cumbria Sites Stakeholders Group Low Level Waste Repository Working Group and are available on the ONR website (<http://www.onr.org.uk/lrc/>).

The site inspector from ONR usually attends, biannually, the West Cumbria Sites Stakeholders Group Low Level Waste Repository Working Group meetings and will respond to any questions raised there. Any person wishing to inquire about matters covered by this report should contact ONR.

1 INSPECTIONS

1.1 Dates of inspections

The ONR Nominated Site Inspector and other ONR Inspectors conducted interventions on the following dates during the quarter:

April	n/a
May	n/a
June	19 to 20

2 ROUTINE MATTERS

2.1 Inspections

Inspections are undertaken as part of the process for monitoring compliance with:

- the conditions attached by ONR to the nuclear site licence granted under the Nuclear Installations Act 1965 (NIA65) (as amended);
- the Energy Act 2013;
- the Health and Safety at Work Act 1974 (HSWA74); and
- regulations made under HASWA74, for example The Ionising Radiations Regulations 1999 (IRR99) and The Management of Health and Safety at Work Regulations 1999 (MHSWR99).

The inspections monitor the licensee's actions on the site in relation to all nuclear operations covering; incidents, operations, maintenance, projects, modifications, safety case changes and any other matters that may affect safety. The licensee is required to make and implement adequate arrangements under the conditions attached to the licence in order to ensure legal compliance. Inspections seek to judge both the adequacy of these arrangements and implementation.

In June ONR carried out a planned system inspection, inspecting the licensee's implementation of the safety case relating to lifting equipment. ONR was accompanied by the licensee's independent safety inspector. ONR concluded that the licensee had adequately implemented the safety case, relating to lifting equipment, in the areas inspected.

In June ONR also inspected the licensee's arrangements for licence conditions 7, 32 and 35.

In general, ONR judged the arrangements made and implemented by the site in response to safety requirements to be adequate in the areas inspected. However, where improvements were considered necessary, the licensee made satisfactory commitments to address the issues, and the site inspector will monitor progress during future visits. Where necessary, ONR will take formal regulatory enforcement action to ensure that appropriate remedial measures are implemented to reasonably practicable timescales.

2.2 Other work

Meetings with the safety representatives

On 20 June ONR's site inspector met LLWR's safety representative. This was a routine meeting during planned inspections, to support their function of representing employees and by giving advice on matters affecting their health, safety and welfare at work.

3 NON-ROUTINE MATTERS

Licensees are required to have arrangements to respond to non-routine matters and events. ONR inspectors judge the adequacy of the licensee's response, including actions taken to implement any necessary improvements. The licensee reported some minor events to ONR in this quarter, in compliance with the licensee's arrangements, which were promptly investigated by the licensee, with follow up reports within sixty days of the event being provided to ONR. ONR is content that the licensee has identified learning opportunities from investigations and actions have been taken to help prevent recurrence.

4 GENERAL REGULATORY ACTIVITY

ONR inspectors may issue formal documents to ensure compliance with regulatory requirements. Under nuclear site licence conditions, ONR issues regulatory documents, which either permit an activity or require some form of action to be taken; these are usually collectively termed 'Licence Instruments' (LIs), but can take other forms. In addition, inspectors may issue Enforcement Notices to secure improvements to safety.

No enforcement notices were issued in this period. No Licence Instruments were issued in this period.

Reports detailing regulatory decisions can be found on the ONR website at <http://www.onr.org.uk/pars/>.

5 NEWS FROM ONR

ONR Chair awarded CBE

- In the Queen's Birthday Honours announced in June, Chair of the Office for Nuclear Regulation, [Nick Baldwin](#), was appointed a Commander of the Order of the British Empire for services to nuclear safety and security in Britain and to the charitable sector.

Regulatory Research Report published

- ONR has published its [annual regulatory research report](#) which describes the [research activities](#) we have conducted in the past year.
- The report includes case studies showing how our research strategy has helped support our regulatory approach, and helps to inform the develop of best practice. It can be viewed at www.onr.org.uk/research

Onr Regulation Matters Magazine

Insight into ONR's work as an independent regulator of the nuclear industry can be found in ONR's Regulation Matters. The online publication (<http://www.onr.org.uk/regulation-matters.htm>) reports on the key themes and developments in each of ONR's regulatory programmes and provides an update about the ongoing changes at ONR. <http://www.onr.org.uk/index.htm>. For the latest news and updates from ONR visit the website and sign up for our ebulletin (<http://www.onr.org.uk/ebulletin/index.htm>).
