25 April 2024

For the attention of [REDACTED] Heysham 1

Dear [REDACTED]

Close-out of ONR Improvement Notice ONR-IN-23-004

Thank you for the letter dated 26 March 2024 confirming that all required works and activities to address ONR Improvement Notice ONR-IN-23-004 have been completed and that compliance with regard to Regulation 12 of the Pressure Systems Safety Regulations 2000 (PSSR) and Section 2(1) of the Health and Safety at Work etc. Act 1974 (HSWA) has been restored.

I am writing to you to confirm that I am also satisfied that the matters identified within the Notice have been rectified. This is based on a number of discussions, plant walkdowns, sampling of the physical and documentary evidence underpinning the work, and engagement with station staff, INA, and others.

I can confirm that the associated Level 2 Regulatory Issue (RI-11894) has been closed.

I would like to thank you and your team for all of the work undertaken and the regular engagement on this matter during the return to service of Units 1 and 2. I would like to note in particular the diligence and thoroughness of the Heysham 1 INA in its oversight.

I would like to emphasize the importance of the thorough and timely completion of the wider improvement actions as identified in the Significant Adverse Condition Investigation into the event, as well as meeting the commitments set-out in the return-to-service safety case. ONR considers these to be important activities and we will continue to monitor these improvements and commitments as part of our routine regulatory oversight.

Information for employees

Section 28(8) of the Health and Safety at Work etc. Act 1974 requires me to give information to your employees about matters affecting their health, safety and/or welfare. I have, therefore, sent a copy of this letter to [REDACTED] as a representative of your employees.

Yours sincerely

[REDACTED]
